

PUBLIC SPEAKING COURSE

Our programs take a fun-filled approach to teaching kids basic public speaking and communication skills - including the important opportunity to stand up and speak in front of peers. Like most life skills, the best way to develop confidence as a public speaker is through practice, and more practice. Young Speakers is proud to provide kids the necessary support and learning platform.

This workshop is geared towards kids in grades 4 to 6 who are quite nervous at the idea of speaking in front of their class, or without much experience in public speaking. The program introduces kids to the fundamentals of public speaking and communication, such as: body language, tone of voice, speaking on the spot, conversation skills and more. The introduction is a combination of education, individual and group activities, presentations - and of course, laughter and fun!

Public Speaking is an essential skill for your kid. Imagine speaking to a classroom full of other kids and knowing that everyone is understanding you and impressed by how comfortable, confident and relaxed you seem. Wouldn't it be nice to never again become nervous before speaking in front of class, teachers or parents?

In this **Public Speaking** for Kids course they will learn the following:

- *How to relax before giving any presentation
- *How to organize your thoughts
- *How to practice your presentation on video
- *How to make teachers, parents and fellow students be impressed by your **public speaking** abilities

This **public speaking** course is delivered primarily through spoken lecture. Because the skill you are learning is speaking related, it only makes sense that you learn through speaking.

The skill children will learn in this class is not primarily theoretical or academic. It is a skill that requires physical habits. That is why each student will be asked to take part in numerous exercises where they record themselves speaking on video, and then watching themselves. Learning presentation skills is like learning how to ride a bicycle. Each student will simply have to do it numerous times and work past the wobbling and falling off parts until they get it right.

These **public speaking** courses contain numerous video lectures plus several bonus books for your training library.

Loaded with tips and techniques on confidence building, topic selection, speech writing and delivery this is a great course for the beginner or even more advanced student of speaking.

The techniques are broken down into easy to understand terminology for kids and yet spoken in such a way that teens can relate to them as well.
